# Alain Badiou – How to Complete Formalization as in fact a Process of Subject, or without subject – how this becomes subjectless world of objects, or objectless world of subject –

By Alain Badiou

I. Many processes between the subterranean current of aleatory materialism and joining the main current of Dialectical Materialism – or the old debate historical and dialectical materialism – what is in the context of a concrete analysis, or some levels of abstraction from it, into even pure theory and history and finally

philosophy at a higher M5 abstraction perhaps of what is the subject called philosophy – the pure dialectical materialism

II. How alithea means a logic of poem with the caveat I nearly missed Heidegger with Aeschylus and shifted to in fact Paul Cohen and mathematics – how alithea is then poetic wandering but to meet the mathematical rigour of philosophy as well as science – since alithea is just the lived experience which is sadness actually till joy and the cure which has to be another subject called amorous, or psychoanalytic – different fidelities to the Freud-Event celebrated by

Lacan, and won by Sirohi as a joined process in fact of curing a medical crisis by logic.

III. Many aleatory trajectories of being-there and its fate, Ittifaq which is theological or secularly covered theology – how in fact the subject is a passing or crossing and just that – the subject exceeds the state and is infinite and free – covering the subject, and objective condition in Lenin. How again alithea is everything that happens ad is Quranic, and Biblical and even Jewish – but then meets the objective measure of Marxism – we mean here

letters and the Prophet Sirohi who is also modern and philosophical as scientific. I mean here how to cover the matheme of theological Kabbalah recently – how we can be living infinite spiritual truth and produce an Eternity of that type.

IV. Althusser’s note –

By Louis Althusser

In fact cover it as a bit of jazz in the purely aleatory sense which then meets Hegel the only major current I meant of philosophy in the dialectical tradition of Plato, perhaps Descartes, Epicurus and even Marx – to produce many

clashing logics which intertwine and intertangle into Hegel – thank you for this formal truth – by Sirohi. He is a great teacher – hopefully Yunan teaches more – like each philosopher in this journey called French philosophy, also American Pippin and West, Cornel West especially. I argue Sirohi bursts out with infinite more processes and produces a clashing logic which means Hegel or Sirohi on this logic of origins and ends traversed by the structure or logic called formalization which then is a structure called Sirohi which is so brilliant – like permanent revolution each day and such breaks which is what I mean by a clashing logic which also means pure master and higher than Lacan any day. He proves the

mettle of men, as the Greeks argue and laughs as a Hegelian on how brilliant he is nonetheless in covering even Spinoza – that other materialist minor resemblance to Hegel. Our Spinoza – that pure Elements of a Dialectical Materialism – which Sirohi makes true, it is that pure stuff. But he is different from itself the clash – of stupid naivity and profound abstraction which then is in Sirohi stupid loving of simple language and young creative language and profound truth which is covered in it, like a revelation each day on this subject, of a simple essay being divine.

I mean clash Hegel and Sirohi and produce a shift – called Sirohianism – just the speculative

meaning at all times of the structure called French Hegel or French philosophy – read carefully, thanks.

## III. Slavoj Zizek’s note

So in fact a number of detours later – Sirohi is the highest philosopher – to compare it to in fact the Hegelian metaphor of being, pure Being and cover that in pure pronounciation which then in Sirohi is – without any further determination – how this speculative bourgeois totalization in Hegel – is in Sirohi bourgeois and materialist in fact – like a pure speculation in infinite self-reference – such poetry is metaphysical – the highest award

for philosophy – now our religion but with his teaching in fact of the French art and the Pippin art even the Malcolm X and Cornel West art – all considered ML style discourse as well.
